

Activity Book

Hey I am your new friend my name is Peter Pencil
And I am going to help you do the things in this
book.

Name: Daniel Rosenquest

Wow, hey look it's my most favourite thing to do its Dot to Dot. U should draw around the dots starting at number 1 and finishing at number 15 or number 20. Then after you have joined all the dots colour the picture in.

MATHS

Hey now we have to listen to how a frog grows up, after you have listened then what you could do is colouring the frog and other things that are on the cycle.

SCIENCE

Frog spawn

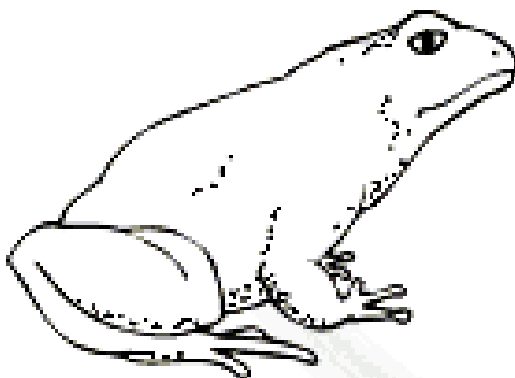

2 day old tadpole

2 week old tadpole

8 week old tadpole

Adult frog

10 week old tadpole

Hey that's how a frog grows up.

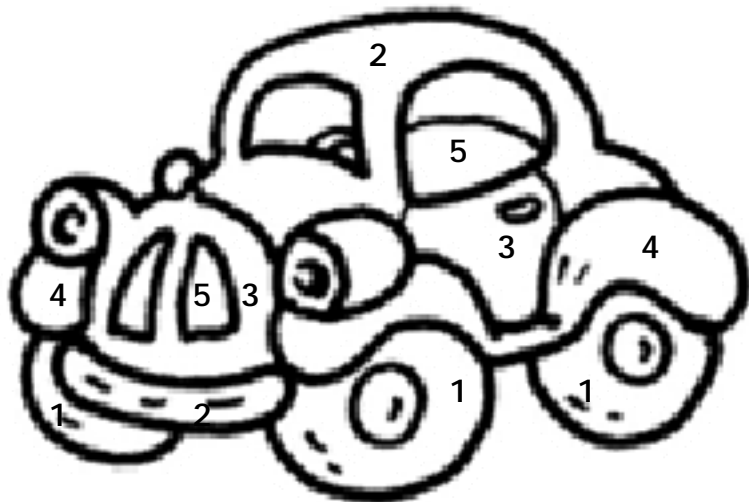

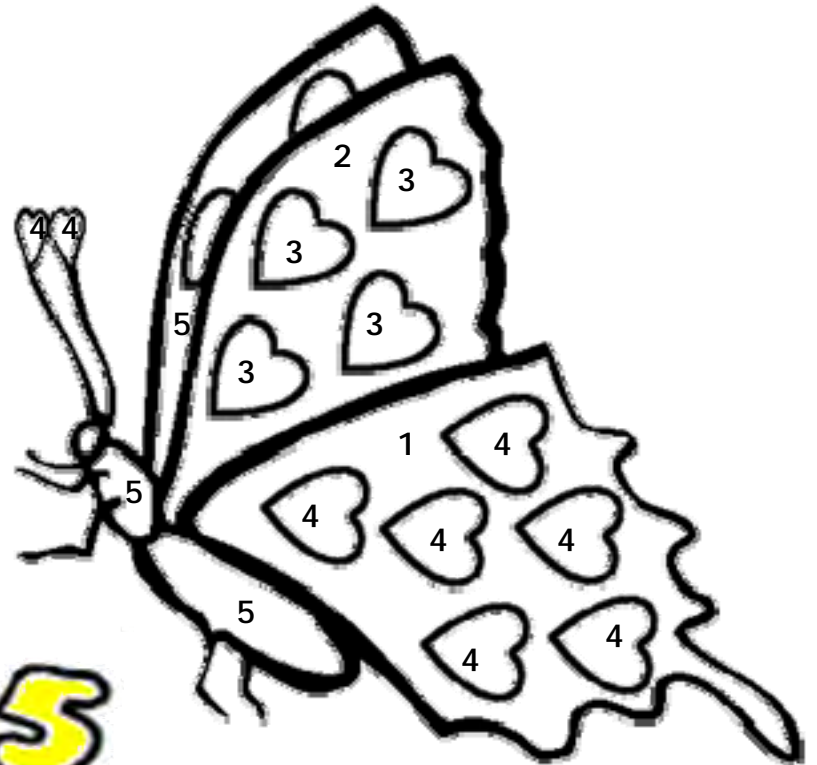

Right then a frog starts life as lots and lots of small gooey balls, after a bit little tadpoles push out of the gooey balls. After 8 weeks (56 days) the little tadpole starts to grow little legs. Then another 14 days later it grows little arms and its face starts to get bigger. Then after it has got to this stage it will take a few more days to be a jumpy friendly adult frog. And the cycle starts all over again.

Now why don't you do this, colour both of the pictures all you have to do is put the right colour in the right white bit.
So if the number 5 says red, then if you see the number 5 you must colour all the white inside red.

MATHS & ART

Why don't you try and match each picture to the right letter, and after that why don't you try to write my name. After you have done the things colour the pictures.

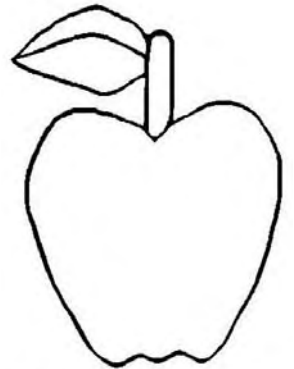

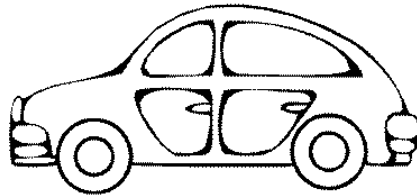

English

A

B

C

Peter Pencil

Hey guys this is the first thing you must do, right you must draw a picture. After drawing the picture you should colour it in and write a small story. If I was doing this I would draw a fast pink car.

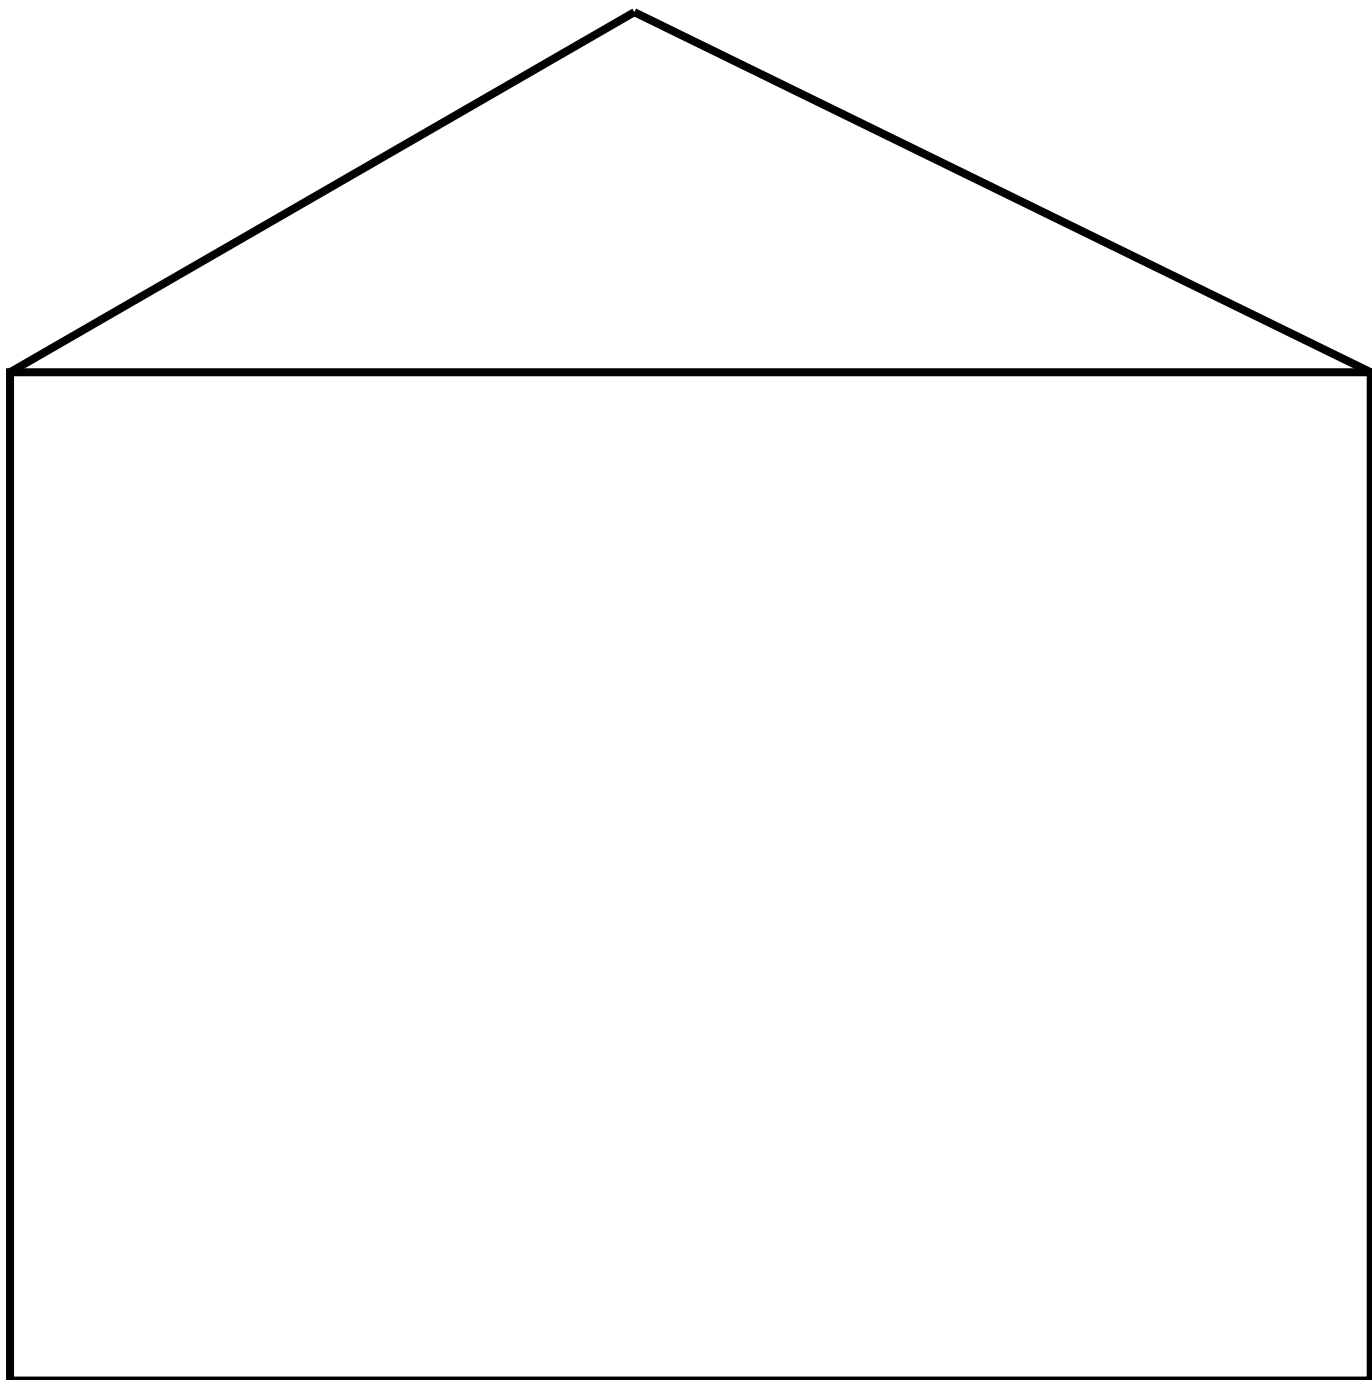

ART & ENGLISH

DRAW YOUR PICTURE INSIDE THIS SPACE.

Now I got an idea why don't you draw your family inside of this lovely house I have drawn for you. After drawing your family write their name so I know who everybody is.
